

Boost your lithium
battery value chain

KNBatteryChain
Certified Lithium Battery Logistics

Certified lithium battery logistics

KN BatteryChain is your end-to-end solution to master the challenges created by the significant increase in the global demand for lithium batteries. The transport and storage of cells and batteries is very cumbersome due to the hazardous nature of the material. With KN BatteryChain your individual shipping and warehousing needs are covered throughout the entire lithium battery life cycle.

Maximum *safety* for your business

Certified systems and processes ensure that your batteries are transported in full compliance with the latest dangerous goods regulations.

Expertise leveraged for your success

Optimize your lithium battery supply chain and boost your business. KN BatteryChain provides you with direct access to more than 600 dangerous goods experts and lithium battery transport specialists across the globe.

Co-created end-to-end solution

Thanks to individual consultation and long-term partnerships, Kuehne + Nagel works with you to co-create a fully integrated end-to-end supply chain solution to suit your specific needs.

Strong foundation for *impactful decision making*

The power of information. We provide you with key performance indicators, full data transparency and expert forecasting as a sound foundation to make decisions that improve your performance.

Efficiency and growth throughout the *value chain*

Cover your logistics needs throughout the entire battery life cycle and grow your value chain. Kuehne + Nagel's global network and strong market position guarantee you reliable performance and peace of mind.

Logistics solutions for the battery life cycle

KN BatteryChain addresses all logistics needs for lithium batteries throughout the entire life cycle.

Service levels made for you

Three service levels allow you to select the right solution for your business needs. Choose from our standardized and certified warehousing or transportation services, benefit from optional upgrades or select the fully integrated solution.

Key features

All our services include the following key features to guarantee the highest degree of standardization, safety and reliability for every shipment:

- Fully certified systems and processes in compliance with the international quality standard IATF 16949
- Full compliance with international dangerous goods regulations through our global infrastructure of 600 Dangerous Goods Safety Advisors (DGSA)
- Door-to-door shipment tracking, tracing and visibility
- Carrier network management that selects certified and trusted subcontractors, with preferential space allotments
- Operators in sea, air, overland and warehouse especially trained on lithium batteries

Upgrades

You can also benefit from greater control and higher performance with our upgrades. Below is a summary of some of the value-added services you can choose from:

- Real-time monitoring of physical parameters and location
- Specialized and re-usable packaging
- Battery charging, de-charging and testing
- Environmental performance measuring
- Returns and recycling services

Contact us to find out what else we can offer you.
